ACADEMY ART PICTURE LIGHT

MINIATURE ACADEMY ART PICTURE LIGHT

The Academy Lights flexibility and light efficiency allows it to overcome most of the limitations of conventional picture lights. Low energy, durable and replaceable LED lamps are employed to deliver optimal color rendering and specially designed. This is achieved through a unique combination of lensed LED heads, which can be: selectively positioned across the picture span, interchangeable between several beam profiles, variably angled against the face of the picture. These features give unprecedented control over the distribution and uniformity of the light, which can be tailored to suit any piece of Art or whatever shape or size. Our lights can also be transferred between paintings of different dimensions; simple re-configuration and re-alignment of the light heads makes them re-usable time and time again. Whatever is required will be calculated by us and delivered to you, ready for installation.

ATRIA 60 WW

B-LIGHT is a young and dynamic company based in Villotta di Chions (Pordenone), situated in the North East of Italy; we design and manufacture LED technology luminaires. Evolving from a thirty year experience in the electronics field designing and manufacturing circuitry and components for a variety of sophisticated industries, B-LIGHT fully recognizes and understands the concept of a LED "electronic light". B-LIGHT designs a product around the LED source, rather than incorporate the LED into an existing luminaire. Fittings are compact, efficient and pleasing to the eye and mould their shape according to the architects, lighting designer and project consultants aims.

Vanilla Lighting is a brand of in house architectural lighting solutions for residential and commercial clients. Founded in New York City by LGN, we recognized the need to simplify the light sourcing process. So, we curated a capsule collection of reliable, affordable and readily available lighting solutions. Our collection is hand selected by industry leaders so you can design an entire project from this line alone. Our approach allows us to keep costs lower for you by eliminating the mark ups associated with the traditional supply chain.
